POW-R-JET® PLUS DRUM MOUNT FOGGER
MODEL 6428

Motors & Motor Parts

PARTS PRICE LIST & ORDER FORM

Fogmaster units can be kept functional and useful even though many years old. Should you need parts or repairs, we support you. This sheet covers motors and motor parts. For non-motor items, download the parts list for your model (links are posted at <http://fogmaster.com/support.htm>).

Motors: A replacement motor must match the operating voltage of the old one, but you can choose the number of fan stages and brush design.

Fan Stages: A 1-stage motor has one fan blade. A 2-stage motor has two fan blades and a taller fan enclosure (see drawing on next page).

Motor Brushes: A motor uses two brushes. The motor brush is a wear part; it erodes preferentially to protect the commutator. Brush life is typically 600-650 operating hours but adverse operating conditions or a worn commutator will shorten its life. Motor brushes are not covered by the product warranty.

The MS [Motor Saver™] brush is a drop-in replacement for a standard brush. It is designed to interrupt power when worn out, to protect the commutator from scratching.

The LS motor offers a substantially longer life (2,000 - 2,500 hours), but its brushes are not replaceable.

Motor Kits: A motor kit includes a 1-stage motor, mounting ring and four motor spacers. To replace a 2-stage motor with a 1-stage motor, use the kit.

How to Order Replacements

1. Determine operating voltage of your unit (see nameplate label).
2. Determine the number of fan stages of the existing motor (see graphic, next page).
3. Select brush type. MS brushes or LS motors are recommended for heavy duty applications.
4. Mark items and quantities (next page), and total product cost below.
5. Fill out the Contact/Ship To Information and Payment Method sections below. An email address is required for order confirmation or tracking information.
6. Mail, fax or scan/email order form. We add sales tax (if applicable) and shipping cost to your order. If you are exempt from Florida sales tax, attach certificate.
